# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference	FOR FURTHER ACTION	See Form PCT/IPEA/416		
98006/26PCT				
International application No.	International filing date (day/month/year)	Priority date (day/month/year)		
PCT/US04/12758 International Patent Classification (IPC)	26 April 2004 (26.04.2004)	24 April 2003 (24.04.2003)		
L'OI				
IPC(7): A61B 5/00 and US C1.: 600/322 Applicant	., 323			
THE BOARD OF REGENTS OF THE	INIVEDSITY OF TEXAS			
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.				
2. This REPORT consists of	a total of ## sheets, including this cover she	et.		
3. This report is also accomp	vanied by ANNEXES, comprising:			
a. (sent to the applica	nt and to the International Bureau) a total of	sheets, as follows:		
sheets of the	description, claims and/or drawings which l	have been amended and are the basis		
	rt and/or sheets containing rectifications aut			
	ection 607 of the Administrative Instructions).			
	ch supersede earlier sheets, but which that goes beyond the disclosure in the in			
	item 4 of Box No. I and the Supplemental Bo			
	he International Bureau only) a total of (in			
carrier(s))	•			
	g a sequence listing and/or tables related ther			
Administrative In	the Supplemental Box Relating to Sequent structions).	ce Listing (see Section 802 of the		
	ations relating to the following items:			
	asis of the report	•		
Box No. II Pi	riority			
Box No. III N	Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial			
	pplicability			
Box No. IV L	ack of unity of invention			
	Reasoned statement under Article 35(2) with regard to novelty, inventive step or			
industrial applicability; citations and explanations supporting such statement				
Box No. VI C	ertain documents cited			
Box No. VII C	ertain defects in the international application			
Box No. VIII C	ertain observations on the international applic	ation

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.	
PCT/US04/12758	

Box No. I Basis of the report
<ol> <li>With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.</li> </ol>
This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of:
international search (under Rules 12.3 and 23.1(b))
publication of the international application (under Rule 12.4)
international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):
the international application as originally filed/furnished
the description:
pages 1-12 as originally filed/furnished pages* NONE received by this Authority on
pages* NONE received by this Authority on pages* NONE received by this Authority on
the claims:
pages 13-18 as originally filed/furnished pages* NONE as amended (together with any statement) under Article 19
pages* NONE received by this Authority on
pages* NONE received by this Authority on
the descriptor
the drawings:  pages 1-14 as originally filed/furnished
pages* NONE received by this Authority on
pages* NONE received by this Authority on
a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3. The amendments have resulted in the cancellation of:
the description, pages
the claims, Nos
the drawings, sheets/figs
the sequence listing (specify):
any table(s) related to the sequence listing (specify):
4. This report has been established as if (some of) the amendments amexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
the description, pages
the claims, Nos.
the drawings, sheets/figs
the sequence listing (specify):
any table(s) related to the sequence listing (specify):
* If item 4 applies, some or all of those sheets may be marked "superseded."

Form PCT/IPEA/409 (Box No. I) (January 2004)

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US04/12758

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1. Statement		·	1	
Novelty (N)	Claims	10-16, 19, 23, 24, 33-39, 42	YES	
radverty (14)		1-9, 17, 18, 20-22, 25-32, 40, 41, 43, 44	NO	
Inventive Step (IS)		15, 16, 19, 23, 24, 38, 39, 42	YES	
	Claims	1-14, 17, 18, 20-22, 25-37, 40, 41, 43, 44	NO	
V 1 A 1 A A 1 I I I I I I I I I I I I I I	Claims	1.44	YES	
Industrial Applicability (IA)		NONE	NO	
2. Citations and Explanations (Rule 70.7)				
Claims 1 - 7, 17, 18, 20 - 22, 25-30/22, 33/22, 40/22,	easuremen gue (colum	22, and 44/22 lack novelty under PCT Article 33(2) as a stay t system (Figure 4; column 6 - 8) suitable for determination 11, lines 41 - 64). It is inherent that at least some of the column 11, lines 41 - 64).	non oi	
Claims 10 and 33/22 lack an inventive step under PCT Article 33(3) as being obvious over the prior art as applied in the immediately preceding paragraph and further in view of Nielsen. Hatschek teaches a system for determining oxygen saturation, but does not teach measurement of carboxyhemoglobin levels. Nielsen teaches that the addition of measurement of a third wavelength sensitive to carboxyhemoglobin can be incorporated into an oximetry sensor to determine the concentration of carboxyhemoglobin and provide more accurate measurement of the oxygen saturation. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Hatschek to include measurement of carboxyhemoglobin, as taught by Nielsen, since this provides more accurate medical information to a user.				
Claims 11 - 14 and 34 - 37/22 lack an inventive step under PCT Article 33(3) as being obvious over Hatschek, as applied to claims 1 and 22 above, in view of Hoeft. Hatschek teaches measurement of oxygen saturation and indicates that other parameters can be monitored (col 4, top). Hoeft teaches that measurement of indicator dyes, such as indocyanine green, is useful for measuring cardiac output. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Hatschek to measure concentrations of indocyanine green, as taught by Hoeft, since this is useful for study of cardiac output values.				
Claims 1 - 4, 8, 21, 22, 25-27/22, 31/22, and 44/22 lack novelty under PCT Article 33(2) as being anticipated by Stavridi et al. Stavridi et al. teach an optical glucose measurement device that can perform measurements from the base of a subject's tongue (column 6, line 24). It is inherent that at least some of the measurement light would irradiate a big vein of the subject's tongue.				
Claims 1 - 4, 9, 21, 22, 25-27/22, 32/22, and 44/22 lack novelty under PCT Article 33(2) as being anticipated by Caro. Caro teaches optical measurement of analytes, including cholesterol, (column 4, lines 52 - 61), from various body portions including the tongue (claim 14). It is inherent that at least some of the measurement light would irradiate a big vein of the tongue.				
Claims 15, 16, 19, 23, 24, 38, 39, and 42 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a device or method including measurement of microwave or RF energy from a subject's underside of a tongue, generation of a static electrical or magnetic field during the measurement, or the particular structure of claim 23, as set forth in these claims.				
NEW CITATIONS
